

Candidacy Quick Reference

Referral triage guide

Portal resource	Secure OD/MD referral workflow support document
-----------------	---

Good referral candidates

- Patients seeking cataract, refractive lens exchange, LASIK, cornea, glaucoma, or second opinion consultation.
- Include best corrected visual acuity, refraction, relevant ocular history, medication list, allergies, and prior surgery history where available.

Attach when available

- Recent chart notes, topography, OCT, visual fields, IOL calculations, prior operative notes, and medication/allergy documentation.
- Use the portal file upload controls for records, topography, OCT, and other supporting documents.

Urgent referral flags

- Rapid vision loss, acute pain, post-operative complication, suspected infection, sudden corneal change, or other time-sensitive findings.
- Flag urgent referrals in the portal and call the clinical team directly when immediate review is needed.

For clinical questions or urgent issues, contact Visionary Eye Surgery directly. This resource does not replace clinical judgment or payer-specific billing guidance.
